adrian klisz

work

spotify
staff designer
2024-Present

Led design for Spotify Jam, resulting in 50M+ MAU and 100M+ monthly listening hours. Led design on Spotify Connect (500M MAU). Helped lead the integration of Spotify's social feature ecosystem.

spotify
senior product designer
2021-2024

Created Spotify Design frameworks for feature onboarding and adapting features from mobile to other platforms. Led design for the Spotify Tap hardware integration with partners like Sony, Meta, and IKEA. Co-founded a product area impacting 500M+ users, focused on seamless device interoperability, proactive recommendations, and social listening.

spotify
product designer
2020-2021

Led design for Spotify's voice partnership integrations with Apple, Google, and Amazon, among others (over 40M MAU).

north inc.
senior ux designer
2016-2020

Led design and research of several core Focals by North (smart glasses) experiences including core IA, maps & navigation, calendar, weather, ride sharing, proactive moments, Alexa, and many more. Responsible for overall system interaction model. North Inc. was acquired by Google.

christie digital
interaction designer
2013-2016

Led design and research for control software and hardware interfaces of professional hardware products such as cinema projectors and screen processors (used in live concerts).

education

mcmaster university
masters degree
2010-2012

Human, Computer, and Spatial Interaction. I studied how augmented reality shapes people's understanding of new urban environments.

university of toronto
bachelors degree (hons.)
2005-2010

English, Human Geography, and Philosophy.

skills

Taking ambiguous, cross-team bets from idea through strategy to shipped product. Systems thinking, software and hardware interaction design. Agentic-first workflows and prototyping in code to test the real thing early.
