

# Adrian Klisz

Senior UX Designer • UX Researcher

adrianklisz.com • kliszaj@gmail.com • (647) 300-1315

## About me

I'm a senior UX designer and researcher, passionate about designing experiences that empower people to use technology more thoughtfully. I'm especially interested in humane technology, wearables, and designing interactions for physical interfaces.

## Experience

- 2016 – Present  
**Senior UX Designer • North**  
Led UX design and research for several core smartglasses experiences including: navigation, calendar, weather, Uber, notifications, contextual moments, Alexa, and many more. Responsible for overall system-level interaction model.
- 2013 – 2016  
**Interaction Designer • Christie Digital Systems**  
Led UX design and research for several business-critical, multi-platform, pro-AV hardware products.
- 2012 – 2013  
**UX Designer • The App Labb**  
Led UX design and research for several mobile (iOS and Android) and web applications.
- 2010 – 2012  
**Researcher • McMaster University**  
Designed a study that observed the effects of augmented reality (AR) computing on user motivations, behaviours, and other cognitive developments (like sense of place) in unfamiliar urban environments.
- 2010 – 2012  
**Teaching Assistant • McMaster University**  
Led tutorials, marked assignments, and invigilated exams for several qualitative and quantitative social research methods courses.

## Education

- 2010 – 2012  
**M.A. • McMaster University**  
Human, Computer, and Spatial Interaction
- 2005 – 2010  
**B.A. (Hons.) • U of T**  
English, Human Geography, and Philosophy
- 2012-2013  
**Certificate • Humber College**  
Marketing Management

## Other skills

- Experienced in facilitating design thinking workshops.
- Experienced with prototyping software such as Flinto, Principle, InVision Studio, Framer, and others.
- Can effectively translate UX research findings into actionable design recommendations and communicate them to developers and stakeholders.
